

## **My Uganda**

*Uganda's future belongs to you.*

*Claim your future.*

*Your nation, your future.*

*We're building now for your tomorrow.*

*We're investing in your future.*

*"My Uganda" frames the achievements and milestones of the government of Uganda, across the key sectors that have a multiplier effect on Uganda's economy and places them within the context of how these achievements directly affect the quality of life for Ugandans. We believe that accomplishments made by the government are most significant to the end user, and how they benefit each of the myriad of diverse individuals, cultures and ambitions. We want the people to know that this government is working **for them**, and that they have every right to claim the future we're building for them.*

## ***Trade and industry***

*The government of Uganda has resolved to revolutionise trade and industry by commissioning factories and establishing systems and networks that improve the income, opportunities and livelihoods of Ugandans. 9 industrial parks have been built so far, with plans to develop a further 31 industrial parks. The government has committed to building industries that provide society with all its needs, from food and shelter to defence and infrastructure. The revolution of trade and industrialisation is the foundation upon which every Ugandan can build the life they deserve. Uganda's future belongs to you.*
